MINUTE ORDER

WHEREAS, Minute Order 51070 authorizes the State Engineer-Director, Deputy Directors, and the Chief Engineer of Safety and Maintenance Operations to determine and fix the maximum loads to be transported or moved on, over or upon any structure or road section which has been weakened or damaged or for other reason has become unsuitable to carry normal loads, for a period of time as required to repair or strengthen the affected facility sufficiently to carry its normal load, but not exceeding 60 days; and

WHEREAS, the typical time required to repair or strengthen the affected facility sufficiently to carry its normal load has increased to 120 days;

NOW, THEREFORE IT IS ORDERED, that Minute Order 51070 be amended to increase the effective time period of the emergency load zoning to 120 days.
